

1, 4, 6 CHANNEL PROTECTION SOLUTION FOR SUPER-SPEED (UP TO 6 GBPS) INTERFACE

 Check for Samples: [TPD1E05U06](#), [TPD4E05U06](#), [TPD6E05U06](#)

FEATURES

- Provides System Level ESD Protection for Low- Voltage IO Interface
- IEC 61000-4-2 Level 4
 - ±15kV (Air gap discharge)
 - ±12kV (Contact discharge)
- IO Capacitance 0.42pF to 0.5pF (Typ)
- DC Breakdown Voltage 6.5V (Min)
- Ultra low Leakage Current 10nA (Max)
- Low ESD Clamping Voltage
- Industrial Temperature Range: -40°C to 125°C

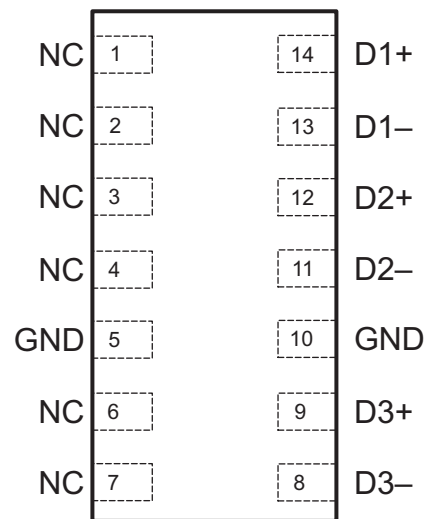

- Easy Straight-through Routing Packages

APPLICATIONS

- HDMI1.4
- USB3.0
- MHL
- LVDS Interfaces
- DisplayPort
- PCI Express
- eSata Interfaces

DPY

RVZ

 3.5 mm x 1.35 mm x 0.5 mm
(0.5-mm pitch)

DESCRIPTION

The TPDxE05U06 is a family of unidirectional ESD protection devices with ultra low capacitance. This family of devices is constructed with a central ESD clamp with two hiding diodes to reduce the capacitive loading. They are rated to dissipate ESD strikes above the maximum level specified in the IEC61000-4-2 level 4 international standard. Its ultra low loading capacitance makes it ideal for protecting any high-speed signal pins.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

This integrated circuit can be damaged by ESD. Texas Instruments recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

ORDERING INFORMATION

T _A	PACKAGE ^{(1) (2)}		QUANTITY	ORDERABLE PART NUMBER	TOP-SIDE MARKING ⁽³⁾
	SON – DPY	Tape and reel			
–40°C to 85°C	SON – DPY	Tape and reel	10K	TPD1E05U06DPYR	C1
	SON – DPY	Tape and reel	250	TPD1E05U06DPYT	C1
	SON – DQA	Tape and reel	3000	TPD4E05U06DQAR	BRL
	SON – RVZ	Tape and reel	3000	TPD6E05U06RVZR	BUL

(1) Package drawings, thermal data, and symbolization are available at www.ti.com/packaging.

(2) For the most current package and ordering information, see the Package Option Addendum at the end of this document, or see the TI website at www.ti.com.

(3) DQA: The actual top-side marking has one additional character that designates wafer fab/assembly site (L in this case).

FUNCTIONAL BLOCK DIAGRAM

Figure 1. Single Channel Schematic Diagram

Figure 2. Quad Channel Schematic Diagram

Figure 3. 6-Channel Schematic Diagram

SINGLE CHANNEL TERMINAL FUNCTIONS

TERMINAL		TYPE	DESCRIPTION	USAGE
NAME	PIN NO.			
I/O	1	I/O	ESD protected channel	Connect pin 1 as close to the connector as possible
GND	2	GND	Ground	Connect to ground

QUAD CHANNEL TERMINAL FUNCTIONS

TERMINAL		TYPE	DESCRIPTION	USAGE
NAME	PIN NO.			
D1+	1	I/O	ESD protected channel	Connect it as close to the connector as possible
D1–	2	I/O	ESD protected channel	Connect it as close to the connector as possible
D2+	4	I/O	ESD protected channel	Connect it as close to the connector as possible
D2–	5	I/O	ESD protected channel	Connect it as close to the connector as possible
NC	6, 7, 9, 10	NC	No connect	Used for optional straight-through routing from D+; otherwise can be left floating or grounded
GND	3, 8	GND	Ground	Connect to ground

SIX CHANNEL TERMINAL FUNCTIONS

TERMINAL		TYPE	DESCRIPTION	USAGE
NAME	PIN NO.			
D1+	14	I/O	ESD protected channel	Connect it as close to the connector as possible
D1–	13	I/O	ESD protected channel	Connect it as close to the connector as possible
D2+	12	I/O	ESD protected channel	Connect it as close to the connector as possible
D2–	11	I/O	ESD protected channel	Connect it as close to the connector as possible
D3+	9	I/O	ESD protected channel	Connect it as close to the connector as possible
D3–	8	I/O	ESD protected channel	Connect it as close to the connector as possible
NC	1, 2, 3, 4, 6, 7	NC	No connect	Used for optional straight-through routing from D+; otherwise can be left floating or grounded
GND	5, 10	GND	Ground	Connect to ground

ABSOLUTE MAXIMUM RATINGS⁽¹⁾

over operating free-air temperature range (unless otherwise noted)

PARAMETER		MIN	MAX	UNIT
T _A	Operating free-air temperature range	–40	125	°C
T _{stg}	Storage temperature range	–65	155	°C
ESD protection	IEC 61000-4-2 Contact Discharge ⁽²⁾		±12	kV
	IEC 61000-4-2 Air-Gap Discharge ⁽²⁾		±15	kV
I _{PP}	Peak pulse current (t _p = 8/20 μs) ⁽²⁾		2.5	A
P _{PP}	Peak pulse power (t _p = 8/20 μs) ⁽²⁾		40	W

(1) Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum-rated conditions for extended periods may affect device reliability.

(2) Measured at 25°C.

ELECTRICAL CHARACTERISTICS

over operating free-air temperature range (unless otherwise noted)

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX	UNIT
V_{RWM}	Reverse stand-off voltage	$I_{IO} < 10 \mu A$			5.5	V
V_{clamp}	Clamp voltage	$I = 1A$, TLP, I/O to ground ⁽¹⁾		10		V
		$I = 5A$, TLP, I/O to ground ⁽¹⁾		14		
		$I = 1A$, TLP, ground to I/O ⁽¹⁾		3		
		$I = 5A$, TLP, ground to I/O ⁽¹⁾		7		
R_{DYN}	DPY package dynamic resistance	I/O to GND ⁽²⁾		0.65		Ω
		GND to I/O ⁽²⁾		0.8		
	DQA package dynamic resistance	I/O to GND ⁽²⁾		0.8		Ω
		GND to I/O ⁽²⁾		0.8		
	RVZ package dynamic resistance	I/O to GND ⁽²⁾		0.8		Ω
		GND to I/O ⁽²⁾		0.8		
C_L	Line capacitance ⁽³⁾	$V_{IO} = 2.5 V$, $F = 1 MHz$, I/O to GND	DPY package	0.42		pF
			DQA package	0.5		
			RVZ package	0.47		
C_{CROSS}	Channel to channel input capacitance	GND Pin = 0 V, $F = 1 GHz$, $V_{BIAS} = 2.5 V$, between channel pins		0.01	0.06	pF
$\Delta C_{IO-TO-GND}$	Variation of channel input capacitance	GND Pin = 0 V, $F = 1 GHz$, $V_{BIAS} = 2.5 V$, channel_x pin to gnd – channel_y pin to gnd		0.05	0.07	pF
V_{BR}	Break-down voltage	$I_{IO} = 1 mA$	6.5		8.5	V
I_{LEAK}	Leakage current	$V_{IO} = 2.5 V$		1	10	nA

(1) Transition line pulse with 100ns width, 200ps rise time.

 (2) Extraction of RDYIN using least squares fit of TLP characteristics between $I = 10 A$ and $I = 20 A$.

(3) Capacitance data is taken at 25°C.

REVISION HISTORY

Changes from Original (December 2012) to Revision A	Page
• Added TPS2EUSB30A part to document.	1
Changes from Revision A (December 2012) to Revision B	Page
• Added Insertion Loss Graphic.	6
• Added Eye Diagrams.	8
Changes from Revision B (January 2013) to Revision C	Page
• Changed IO Capacitance range	1
• Added Top-Side Markings	2
• Changed test conditions and typ values for V_{clamp}	5
• Added typ R_{DYN} values for DQA and RVZ packages	5
• Added C_L values for DQA and RVZ packages	5
• Changed table note (1)	5
• Changed CURRENT vs VOLTAGE graphic	6
• Changed Insertion Loss graphic	6
• Changed HDMI Eye Diagrams	8

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) Only one of markings shown within the brackets will appear on the physical device.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
